Tips & Tricks For Family Island APK If you know some tips and tricks for any game, you are more likely to gain an advantage over other players. That's why you can check out this quick guide for the Family Island APK game below. Find The Merchant At The Marina All primitive societies relied strongly on trading, and so would you. By meeting with the merchant at the marina, you can trade with him for items you need. Remember that there are many things you can not produce on your own, and therefore trading is the only way. Remember that the Merchant's ship will visit every four hours, so try to have what he demands. He always shares his list of demands in advance, and if you complete the list, you can trade for gifts. Whatever you need: diamonds, energy points or food, will be available in such trades. In any task, the game will usually ask you to locate some items. Be it a new plant type, or a treasure even, you should learn to look for hints. These awesome items are usually under the very thick fog or in a position difficult to find. That's why you should utilize the in-game Tips in the shape of a magnifying glass. By clicking on this magnifying glass, you can easily see a yellow arrow popping up to pinpoint the location. Simply follow that arrow to discover the hidden gems you are after. Give Everyone Tasks At All Time The game starts out on a deserted island, and we can imagine how hard it is to survive in such a condition. Therefore, the whole family should focus on hard work and always being productive. As the protagonist of the family, you should give everyone tasks to keep busy at all times. Don't let your primitive factories go idle. Make sure you are planting some crops to harvest as soon as you can.
